### **Lecture Notes on Elliptic Partial Differential Equations**

Second order linear partial differential equations (PDEs) are classified as either elliptic, hyperbolic, or parabolic. Any second order linear PDE in two variables can be written in the form

The discretised equations can be expressed as the matrix equation.  $Aw = f$  Help us think about methods in an abstract way. university-logo Dr. Review Poisson's Equation The Linear Algebra Problem Summary We have shown how to discretise a model elliptic problem.

The simplest example of an elliptic partial differential equation is the Poisson equation (the Laplace equation when  $f=0$ ): (1) Examples of difference schemes for the Poisson equation are given in the articles Boundary value problem, numerical methods for partial differential equations and Difference equation .
