COMPUTATIONAL FLUID DYNAMICS The Basics with Applications

The MSc Applied Computational Science and Engineering will educate future domain-specialists in computational science. The programme takes students through a programme of learning that will enable a deepening of knowledge and skills associated with cutting edge computational techniques for science and engineering applications.

Engineering Applications of Computational Fluid Dynamics

Computational science and engineering (CSE) is a relatively new discipline that deals with the development and application of computational models and simulations, often coupled with high-performance computing, to solve complex physical problems arising in engineering analysis and design (computational engineering) as well as natural phenomena (...
