Schaum's Complex Variables - baileyworldofmath

Geometric series are some of the only series for which we can not only determine convergence and divergence easily, but also find their sums, if they converge: Geometric Series. The geometric series $\sum_{n=0}^{\infty} ar^n$ converges to $\frac{a}{1-r}$ if $|r| < 1$, and diverges otherwise. Proof. If $|r| \geq 1$, then the geometric series diverges by the Test for Divergence, so let us suppose that $|r| < 1$. Let s_n denote the ...
