Safe usage – Colloidal silver – generators sold to home hobbyists all produce ionic silver solutions. Because ionic silver products contain a low percentage of their silver content in the form of particles, they all have a fairly low particle surface area relative to the total silver content.

Silver Colloids: Colloidal Silver Product Reports

The medical uses of silver include its use in wound dressings, creams, and as an antibiotic coating on medical devices. Wound dressings containing silver sulfadiazine or silver nanomaterials may be used on external infections.

Today the synthesis of silver nanoparticles is very common due to their numerous applications in various fields. Silver nanoparticles have unique properties such as: optical and catalytic properties, which, depend on the size and shape of the produced nanoparticles.

Nano-biotechnology has emerged as an important division of nanotechnology. One of the important aspects in the field of nanotechnology is the development of a more consistent process for the synthesis of nanomaterials more than a range of size (with good monodispersity) and chemical composition (Rai et al. 2011).
